

For Agency Brokers... Every client. Every order. Every time.

AxeTrading gives Agency Brokers complete control over their client orders – from inception, to execution, to reporting – all in one platform:

- Execute for your clients more effectively, across every order type, and every channel
- Be more efficient – saving you time, money and enabling you to handle more orders
 - Be compliant with MiFID and Best Execution regulation

The AxeTrading Advantage

Bringing all orders into a single, normalised order book for easier and more effective management

- Real-time pricing management and aggregation for better order execution, servicing and client satisfaction – helping to grow your business
- Consolidated market depth captured at execution – for MiFID II/Best Execution compliance, demonstrated through a more complete audit trail
- Aggregating client requests and orders from all market channels and order types – for better client service and total market coverage
- A unified, compliant and seamless workflow across electronic and voice – improving efficiency with all transaction data at hand

Every client. Every order. Every time.

Our clients choose AxeTrading, again and again, as the market leaders in specialist Fixed Income eTrading technology solutions – powering their business with:

EFFICIENCY – Intuitive UX / Aggregated Data Display / Dedicated FI EMS

Increases efficiency by delivering a sophisticated, intuitive and powerful eTrading experience in one single application. All the transaction, pricing and counterparty data needed to capture opportunity, displayed in one place, customisable to individual preferences, and feeding into a streamlined workflow specifically designed for effective Fixed Income order execution and improved client servicing.

ACCESS – Venues / Integration / Unified

Provides a single point of access to a global universe of Fixed Income execution venues – through simplified connectivity to all your firm's Fixed Income platforms across the world. Data from these venues is aggregated, normalised and integrated into a single, unified experience – execute business faster, more accurately, more profitably.

CONTROL – Pricing / Tiering / Automation

Puts traders in complete control of their relationships across the global Fixed Income markets and gives them more time to focus on profitable business. Bespoke or automated pricing ensures competitiveness and best execution; workflow automation reduces risk and maximises effectiveness.

COMPLIANCE – Best Execution / Market Depth / MiFID

Ensures compliance with peace of mind in today's rapidly shifting regulatory landscape. AxeTrading's technology: captures granular snapshots of aggregated market depth and competing pricing with a more complete audit trail at the moment of execution; meets Best Execution requirements under MiFID II; and automates trade capture to fulfil reporting obligations.

AGGREGATION – Orders / Pricing & Market Data / Clients

Delivers a single, clear, customisable perspective into the fragmented Fixed Income markets by aggregating all your firm's available sources of liquidity, pricing & market data, as well as client orders and notifications, into a single view – seamlessly combined with the tools to forge that information into business. It's not about how many screens you have, it's about how effectively you can spot and capture the trading opportunities and service your clients.

INSIGHTS – Audit / Reporting / Business Intelligence

Enables Fixed Income traders to fully leverage the benefits from the migration to electronic trading. More complete audit trails, auto-generated regulatory reports, and the ability to analyse and understand your firm's historic trading data, give you a better business insight and improve profitability.

We would value the opportunity to discuss AxeTrading's suite of Fixed Income electronic trading solutions with you – and to learn more about your business and technology needs. Contact us today.
